UP-X898MD

Hybrid Graphic Printer

UP-D898MD

Digital Graphic Printer

The UP-X898MD and UP-D898MD are compact medical grade black and white digital printers designed to be integrated into both analog and digital medical imaging environments such as mobile C-arm, cardiac catheterization laboratory and digital ultrasound systems.

The high quality thermal print engine can produce hard copy prints of still images captured by these systems for use in patient records and referrals.*¹ For even greater convenience, printed still images can also be stored to a connected USB flash drive.*²

These printers are successors to the popular Sony UP-897MD and UP-D897 of medical printers. Redesigned and upgraded, it offers several operational and ergonomic enhancements while retaining the same space-saving footprint and easy integration into medical carts. Usability is further enhanced by an enlarged LCD display panel and joystick for intuitive menu navigation.

Both models are capable of delivering high-quality black & white prints in less than two seconds. Advanced thermal printing technology delivers photo quality results using widely available Sony's print media.

The UP-X898MD can accept both analog video and digital signal inputs, while the UP-D898MD accepts digital signal inputs only.

*¹ The images printed from the UP-X898MD and UP-D898MD are not to be used for diagnosis.

*² This feature is only available on the UP-X898MD.

Key Features

High quality printing

Advanced thermal printing technology enables photo-quality black & white prints with a high resolution up to approximately 325 dpi and grey levels up to 256 steps.

A6 prints in less than two seconds

While operating in high speed mode, these printers can produce A6-size prints in approximately 1.9 seconds (when used with UPP-110HG or UPP-110S print media).

Accepts both digital and analog video input signals

A choice of analog composite video*³ and digital inputs allows flexible use with a wide range of modality devices.

USB flash drive storage*⁴

The UP-X898MD can automatically store printed images from both USB and Video inputs onto a connected USB flash drive.

Compact, space-saving design

Measuring 88mm (H) x 154 mm (W) x 240 mm (D), these printers have the same space-saving design as the predecessors for easy, flexible integration into medical carts.

Enhanced operability

Building on the success of the popular UP-897MD and UP-D897, these printers feature an enlarged LCD panel that displays printer settings, selected paper type and advisory messages. An intuitive joystick control allows speedy menu navigation, while the new Auto Lock mode prevents unintentional changes to print settings.

Hard copy reference of print settings

For convenient reference, selected settings (Brightness, Contrast, Gamma and Sharpness) can optionally be printed in a blank space on the print paper.

Uses widely available print media

Sony offers a choice of three high quality, widely available thermal print media types to meet the needs of different applications. Choose from the UPP-110HD, UPP-110S, or the UPP-110HG High Glossy Printing Paper that produces glossy, long-lasting near-photo quality prints.

Wide PC compatibility

For maximum flexibility, a wide range of PC drivers are provided for Windows XP, Vista, 7 and 8 (32/64bit).

Quick guide print

Quick instruction guides for different print operations can be selected via the front control panel. They can be printed out for easy reference without needing to refer to the user manual.*5

Compliance with Medical Safety Standards*6

This device is compliant and certified for IEC 60601-1 and product safety standards in the U.S.A., Canada and Europe.

*3 Analog input is only available on the UP-X898MD.

*4 This feature is only available on the UP-X898MD.

*5 English only.

*6 Registration status as a medical device may vary, depending on country.
